

Getting Started with Sphero

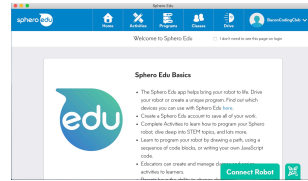

1. Go to sphero.com

- Look for the Education tab on the top of the page
- Find the Education App and click the Windows version

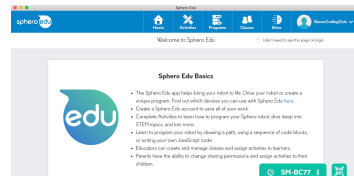

2. Open the Sphero Education app

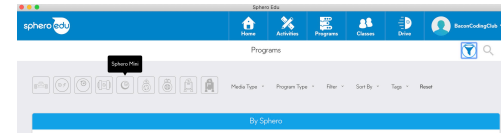

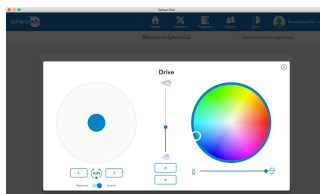

3. Connect your Sphero Mini.

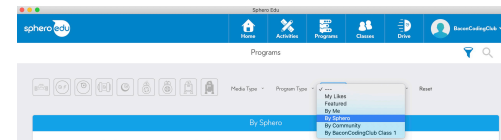

- Plug in the USB cord to wake it up
- Connect your sphero. Find the green “Connect Robot” button on the lower right corner.

4. Practice with the joystick. On the blue toolbar, find the “Drive” tab. Make sure you calibrate the “Aim” function first. Set up obstacles and practice driving the robot.

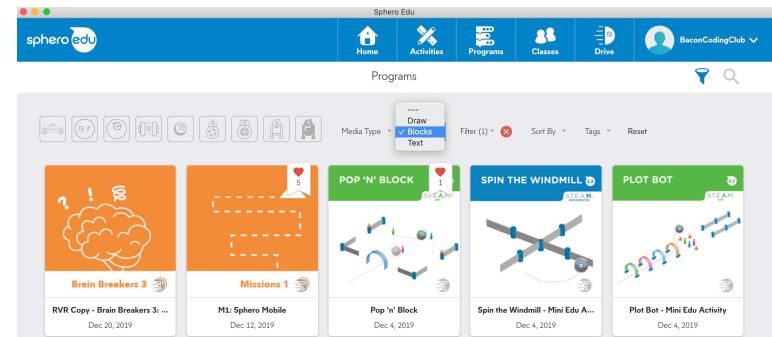

5. Find an easy program by clicking the “Programs” button on the blue toolbar. Then use the filters to find something fun.

Program Type: “Block”

Filters: “By Sphero”

Best programs to start with:

7. At 2:20, click the green robot button in the lower right corner and power down your Sphero. Collect the obstacle pieces and USB cord and put everything away. Sign out of your chrome book, find the correct charging rack, and plug it back in.
